Allowable Subject Matter

1. Claims 2-7 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record teaches *a packet scheduling method for streaming multimedia data by a server in a network, the network including the server for providing multimedia data divided into picture groups each having a sequence of N pictures and a terminal for displaying the multimedia data received from the server in a streaming manner, the method comprising the steps of: dividing the sequences of the pictures into motion part packets and texture part packets, and assigning priorities to the packets according to temporal scaling; determining a threshold Θ_0 for a predetermined priority in consideration of conditions of a channel and a buffer status of the terminal and constructing a substream using packets with priorities below the threshold Θ_0 within the respective picture groups; and sequentially transmitting the packets in the constructed substream to the terminal.*

The combination of Iwata et al. (US 2004/0114516 A1) in view of Towler (US 2004/0047594 A1), and further in view of Apostolopoulos (US 6,611,530 B1) discloses aforementioned features as outlined in the Detailed Action of the Non-Final Rejection dated October 24, 2007, but does not teach or suggest that the threshold is determined using the equation disclosed in amended claim 4, that a loss rate is calculated using the equations disclosed in amended claim 6, and that a loss rate is calculated in consideration of a variance of channel bandwidth using the equations disclosed in amended claim 7.

Therefore, claims 2-7 are allowed.

Conclusion

The amendment to the claims that was entered on April 23, 2008 was entered as an "Amendment After Final". This was done in error because the amendment was in response to the Non-Final Rejection dated October 24, 2007. It should have been entered as an "Amendment After Non-Final". Therefore, the After Final Amendment was not initialed and notated as being "OK to Enter" or "Do Not Enter". If it is necessary to initial and notate the amendment as being "OK to Enter", then Examiner will act accordingly.
